

- 1.** Trading in the Forex and other capital markets is considered Risky and Speculative. The leverage available in trading means that a relatively small movement can lead to a proportionately much larger movement in the size of any loss or profit. It can work against you as well as for you, and lead to large losses as well as gains.
- 2.** The relevant markets for Trading are characterized as high volatile markets, which inherits high risk, and may cause high losses to the deposit funds, and in a short period of time. The Company is not and will not, in any way, be responsible to the trades executed, or not executed, by the Client.
- 3.** The Client is ultimately responsible for all of the losses suffered in their account. As a consequence, the Client should be prepared to lose all funds which he has deposited. The Client is also responsible for losses that exceed its profits and deposits. The Client should never fund his Trading activities with retirement savings, loans, mortgages, emergency funds, funds set aside for purposes such as education or home ownership, or funds required for current income or present or future medical expenses.
- 4.** Rules and Regulations. The Client must know and follow the rules and regulations applicable to the Company's Trading services as set forth in the documents and agreements delivered to and signed or approved (by way of internet approval) by the Client. Not following the rules and regulations applicable to Trading or any other applicable regulation may result in forced closure of positions ("Trades"), temporary freezing of the Client's account, closing the account and/or other actions necessary for the protection of the Company.
- 5.** Transaction Costs May Reduce Profit Taking. Be aware that every time an individual trade is placed, the Company profits from the Ask/Bid Spread. These transaction costs are a major cause of Traders not being able to increase their trading size and developing as a trader. The total daily/monthly/yearly commissions may add to losses and/or significantly impact and reduce profits.
- 6.** Knowledge of Our Software Programs. The Client must be knowledgeable in the use and functionality of the Trading software provided by the Company, or by any third-party provider, in order to correctly interpret account information and to be able to place orders correctly. The Client shall be responsible for all orders placed in his account, regardless of his understanding of the system functionality. If the Client is not in complete understanding of the way the system operates, he should not trade before obtaining the required knowledge.

- 7.** Overnight Positions are considered Risky. Holding large positions, especially after the close of the relevant market (or in any case of cease of commerce, corporate events, freeze of trading on a security etc.), may result in considerable losses. Opening prices (next day or renew of commerce) can be significantly different from the previous closing prices; such prices changes may also significantly change the result of stop-loss orders.
